

“There’s no reason for a PLM project if you don’t know what you want to achieve. There’s no effect of a PLM solution if nobody uses it”

When PLM is the means and the effect is the goal

PLM SYSTEMS ARE INTRODUCED FOR A REASON.

You have defined a business case and now you want the best PLM solutions to solve the problem. But you know from experience that the system is only a part of the solution. There will be no effect if the users are not prone and prepared.

RETURN ON INVESTMENT is all about getting affordable, good enough solutions into use as fast as possible and then continue to improve and enhance.

ASSOCI8 CAN CONTRIBUTE to your change program involving PLM with

- Strategies
- Business Change Management
- Business Development
- Program & Project Management

For other competences we cooperate with Altegra for local PLM expertise and with Flexur for cost effective near or offshore competence and resource provision
